SKILLS

- Web Development

• App Development

• Effective Communication

• Adaptability

• Frontend Development

• Problem-Solving

• Collaboration and Teamwork

• Time Management

• Analytical skills

• Ethical Decision-Making

• Leadership and Mentorship

• Attention to Detail

• Backend Development

EDUCATION

University of Ibadan

2017 - 2021
Second Class Upper - Bachelor of Arts

Universitas Urbaniana Rome

2017 - 2021
Second Class Upper - Bachelor of Philosophy

PROFILE

Skilled Software Engineer with a strong record in designing scalable web applications and software solutions. Led the creation of an automated testing framework, reducing deployment errors by 30% and improving release efficiency by 25%. Proficient in API design and optimization to boost system functionality and user satisfaction. Committed to high-quality, business-aligned solutions that drive user retention.

WORK EXPERIENCE

Decagon Institute - Team Lead (Fullstack Developer)

OCTOBER 2023 - JANUARY 2024

- Led the cross-functional development team at Decagon Institute in Benin, overseeing the creation of MonieFlex, a versatile banking app with a web interface.
- Orchestrated the use of Java Spring Boot for backend security, React JS for a user-friendly frontend, and seamlessly integrated Flutterwave API and VTPass API to enhance the app's functionality.
- Conducted rigorous code reviews, emphasizing adherence to established coding standards, design guidelines, and the implementation of principles such as DRY (Don't Repeat Yourself) and SOLID.
- Played a pivotal role in mentoring team members and fostering collaboration.
- Fostered a culture of excellence and ethical decision-making within the development team, contributing to the overall success and cohesion of the MonieFlex project.

Technologies used:
Third-Party API - VTPass (For bill payment), Flutterwave (For bank transaction)
Frontend - React Js, Bootstrap, CSS
Backend - Springboot, Spring Security, JWT

BossLady Exchange - Web Developer

JANUARY 2022 - MARCH 2022

- Developed a mobile-responsive user interface using React.js and CSS, ensuring a seamless experience across various devices and screen sizes.
- Leveraged Bootstrap to expedite the development process, creating consistent and visually appealing UI components while maintaining flexibility for customization.
- Employed React best practices to design and implement reusable and efficient components, resulting in improved application performance and faster load times.
- Integrated and consumed third-party APIs seamlessly into the application, enhancing its functionality and providing users with real-time data and dynamic content. Eg. WhatsApp Business and Facebook APIs.

Technologies used:
Frontend - React Js, CSS
Backend - Firebase

EVARISTUS ADIMONYEMMA

FULL STACK SOFTWARE DEVELOPER

M-Pay - Frontend Web

Developer

MAY 2021 - SEPTEMBER 2021

- Developed and maintained responsive and interactive user interfaces using React.js, ensuring a seamless user experience across various devices and screen sizes.
- Leveraged CSS and Bootstrap to implement consistent and visually appealing styles, adhering to design specifications and ensuring a cohesive and polished appearance throughout the application.
- Ensured web accessibility standards (e.g., WCAG) were followed, making web applications inclusive and accessible to users with disabilities.
- Integrated third-party APIs seamlessly into the React.js application to enhance functionality, such as incorporating payment gateways and geolocation services.
- Conducted performance optimization techniques, such as code splitting and lazy loading, to improve page load times and overall application performance.

Technologies used:

Third-Party API - Flutterwave (For bank transaction)

Frontend - React Js, CSS, Figma

Backend - Supabase

Serchservice Inc. - Software Engineer

JANUARY 2021 - PRESENT

- Developed an intuitive dashboard for electricians, mechanics, and plumbers, enabling them to manage service requests efficiently and track their schedule seamlessly.
- Utilized geolocation APIs to integrate real-time location tracking, optimizing the dispatch system and ensuring timely responses to service requests.
- Applied UX best practices to improve the overall experience for service providers, resulting in a streamlined onboarding process and increased user satisfaction.
- Led the full-stack development of mobile applications for iOS and Android, empowering service providers to access and manage job assignments on the go.
- Integrated a secure payment gateway, providing a seamless and transparent payment process for service providers and fostering trust within the platform.
- Conducted technical training sessions for onboarding new service providers, showcasing the platform's features, and addressing any technical queries, demonstrating effective communication and mentorship skills.
- Implemented robust security measures to protect user data and ensured compliance with industry standards and regulations, exhibiting a commitment to ethical decision-making and data privacy.

Technologies used:

Third-Party API: Paystack (For bank transaction), GetStream (Video and voice calls), Google map, Firebase messaging (For notification), Twilio (For sms), MailerSend (For emails)

Frontend - React Js, Bootstrap, CSS, Flutter

Backend - Springboot, Spring Security, JWT, GetStream, Firebase,

PROJECTS AND COLLABORATIONS

- Instagram and WhatsApp Clone  Flutter, Firebase, Github
- Facebook Clone and Library Management  Java, ThymeLeaf, Postgres
- BDC - Bureau De Change App  Flutter, Supabase, Github
- EasyList  A Java list dependency built like flutter list view package

COMMUNITY

_CodingThings Tech Community

2022 - Present

- Built a platform where tech lovers, frontend developers, backend developer, software programmers, UI/UX designers and lot more.
- Held master classes for those that need help and education in some areas where the tech community is best at, all for free.
- Just started advocating for a _CodingThings academy where tech will be taught in its own extent.
- Started a collaboration with some of the tech community developers to create a _codingThings website and mobile applications using flutter and nextJs.
